Installation of Node JS

➢ To install node.js in your machine visit the official website

http://www.nodejs.org

➢ Download suitable version of node.js as per your operating system
➢ Once you are done with installation to check the version of node.js installed in your machine open the command prompt and type the following command

node -v | node –version

Note : As part of node.js installation , npm will also be installed automatically

Uplatz

Running Node JS Application

Choose any editor and write java script or node js related code and use the following command to execute Node Js Application

node filename.js | node filename

Thank You
